

# TULIPZ

## Quality rhyming with Sustainability

*We empower people who build quality products that transform our lives and respect Earth's resources by making the world's best industrial monitoring solutions using Terahertz and AI.*

Hani Sherry, cofounder & CEO TiHive  
hani@tihive.com

# TiHive History

- Deeptech startup built in 2017 by ex-STMicroelectronics researchers
  - CEO Hani Sherry, PhD in Terahertz silicon-based systems
  - CFO/CIO Carlos Prada, PhD in high performance computation
  - 23 people, experts in THz, AI and ML, semiconductors, electronics, material sciences
  - 10 nationalities, 15 languages, lots of croissants
- Received around 12M€ funding from:
  - BPI France, Grenoble Metropole and Auvergne RhoneAlps region
  - European Commission and the EIC Fund
  - **Currently in commercial Scaleup phase.**

EU PROJECT NAME  
**TULIPZ**

TIHIVE

# quality diapers improve lives

- Babies will use about **6000** diapers during their first two years of life.

# Diaper industry is very wasteful and expensive

## Polluting

- 3<sup>rd</sup> largest single-use consumer item in landfills.
- at least 500 years to decompose.

## Expensive

- Cost for a single baby around €80 a month and €900 a year.
- 1 in 3 parents cut back on basic essentials to afford diapers for their children.

## Challenges are in dosing super-absorbent polymers

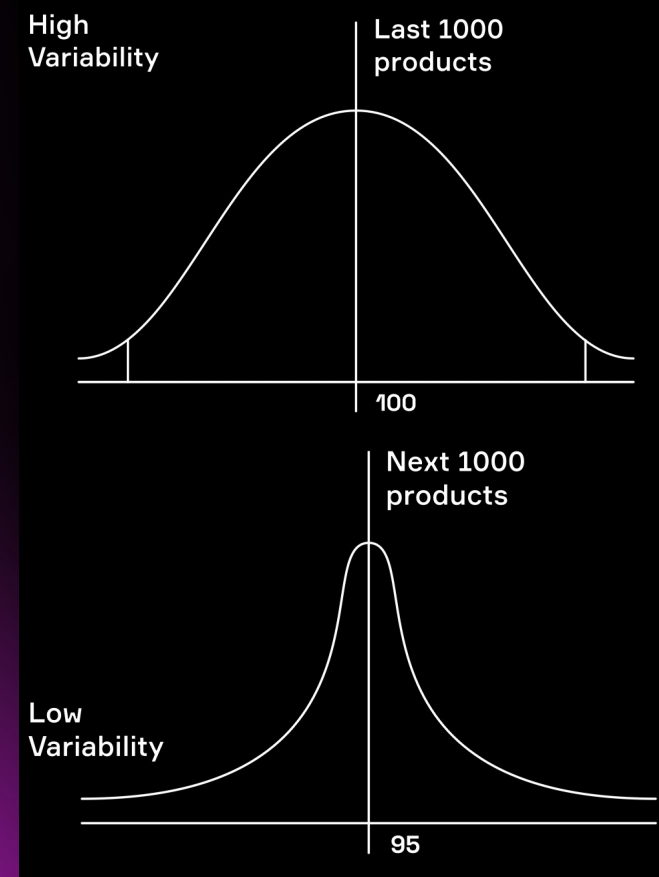

- Polymers make 50% of diaper cost
- High Speed Production = big **variability** issues
  - Overdosage = financial losses and plastic waste
  - Underdosage = leaky products
- **Until recently, no Methods exist today that can monitor and quantify SAP at these extremely high speeds**

Super absorbent polymers (10B€ market)

# What is needed is a vision & control technology that can help:

- MONITOR 100% products
- STABILISE variability
- REDUCE raw materials
- IMPROVE quality

# Limited Solutions

# TULIPZ – a scalable Terahertz-AI inline inspection platform for quality and resource management

A World First Terahertz Camera System based on Silicon Semiconductor Chips

- Fully integrated from chip to cloud
- Highly Scalable and modular
- See Through and Safe Vision technology

# TiHive – inline Process & Quality Monitoring Platform

# Terahertz Light

→ Safe see-through light

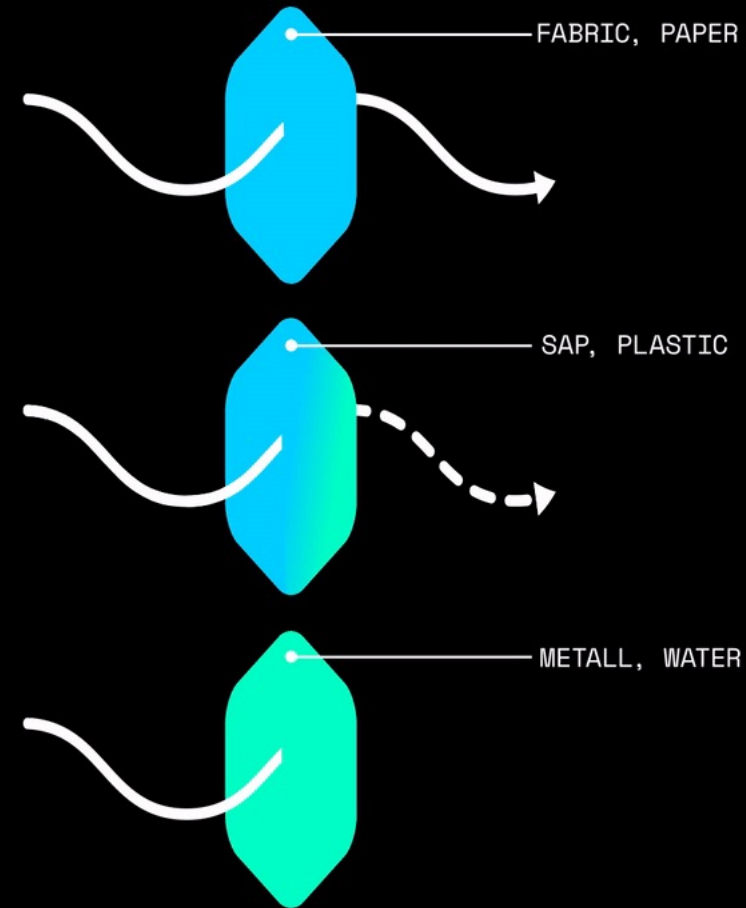

→ 300GHz to 3000GHz

→ Detects

- Defects
- Contamination
- Features

→ Measures

- Material quantity
- Quality

Terahertz interactions

# TiHive's breakthrough see-through monitoring platform

- Each and Every Product qualified
- Fully Inline & high speed
- Multi User
- Multi-KPI
- Local or Cloud
- Easy to integrate and scalable

# Breakthrough Semiconductor chips

- Industrial grade Terahertz Camera & Sources
- Miniature and mass-production
- Best in class performance
- 1000x lower production cost vs competitors
- 100x lower energy consumption vs competitors
  
- The first in the world to miniaturise and scale Terahertz generation and detection

TIHIVE TERAHERTZ SEMICONDUCTOR CHIP

# Terahertz Optics

High levels of electro-optic integration

Scalable modules

High resolution multipixel

TIHIVE TERAHERTZ CHIP MODULE

# Terahertz AI multiuser Quality Platform

- User friendly intuitive design
- Production KPIs:
  - Quality Classification
  - Sustainability measurements
  - Root cause Analysis
  - Process Stability
  - Raw materials waste & Saving
- Proprietary AI and imaging algorithms
- Edge computing
- Cloud analytics

TIHIVE THZ AI SW PLATFORM

TULIPZ full system successfully developed and deployed in production lines

## EARTH TO THE SUN

## 30 ALLER-RETOUR BY CAR

## EIC Accelerator helped us

- Build a talented team and professionalise our internal processes
- Develop a highly complex full-stack deeptech solution and reach TRL9
- Equipe TiHive with state of the art facilities
- Deploy pilot lines and validate use cases with customers in Europe and US
- Adapt to COVID crisis

The EQUITY funding is helping us

- Prepare for our Commercial Scale-up and attract high-calibre Investors interest

# Next Round Objectives

€8,6M EIC Accelerator: €2,3M Grants + €6,3M Equity (2M€ released as ORA) + VCs

€1,8M from BPI France ADD Grant/AR

## 2 years Objectives

### **Sales and Marketing**

SCALE-UP IN EUROPE AND USA  
DEPLOY 100 LINES  
DEVELOP NEW VERTICALS IN SENSING

### **RnD & Operations:**

ASSEMBLY, TESTING AND MAINTENANCE  
FACILITY  
Higher and multifrequency chips with higher  
integration level
